Subject: TPC - South 4 Group Fire - 120619 0900 situation update
Attachments: TechStar Radiation Source Inspection.pdf

Good morning George,

Just follow up from our discussion this morning, I'm providing the July 2019 inspection report we received from the facility regarding their five Cs-137 sources at this facility.

Please note that sources TPC reported sources 1 through 4 are not located in the impact zone of the November 27, 2019 incident, but are being assessed by TPC. Source 5, with the lowest mCi (2) is located in the impact area and has been confirmed to be secure in a closed source container.

All five sources are for monitoring flow and density for the facility operations.

If you need any additional information, please do not hesitate to reach out.

VR,
Adam
